

# What's it mean to be Green?

Green Party members are a diverse group united by a shared belief in key values.

## **Ecological Wisdom**

Greens recognize that the Earth sustains all life forms. Whatever we do to the web of life, we do to ourselves.

## **Social Justice**

Greens find the worldwide growth of poverty and injustice unacceptable and are working for a world in which all can fulfill their potential regardless of their age, sex, race, citizenship, or sexual preference.

## **Grassroots Democracy**

The powerless suffer the most from resource exhaustion and toxic pollution. Greens believe in direct participation by all citizens in the environmental, political, and economic decisions that affect their lives.

## **Nonviolence**

Greens reject violence as a way of settling disputes. It is short-sighted, morally wrong, and ultimately self-defeating. We are working to end war forever.

We need your help!

## **Join the petition drive to get your candidates on the ballot!**

Only with your help can we overcome Indiana's high barriers to ballot access. Our strength lies not in bloated campaign war chests, but in the dedication of concerned volunteers like you.

## **Make a financial contribution!**

Green candidates accept no donations from corporations or special interest groups. Instead, many small contributions from citizens like you pay for the leaflets, yard signs, and bumper stickers that help spread the Green message.

And above all...

# Vote Green!
